Sports Equipment (Playground)	£373.78
HLTA Forest School Sessions	£1,344.89
New Play Trail	£7,500
<b>Total: £17,957.54</b>	

## Impact of PE Sports Funding and PE Provision

- Four members of staff across the school participated in high-quality training sessions and lesson support through our Angmering Partnership. Locality PE specialist Pete Gwynn shared his expertise with school staff based in EYFS, Year 1 and Year 2, supporting with the delivery of lessons, planning and assessment.
- Lesson observations conducted by the PE co-ordinator found that high-quality teaching of at least a grade 'good' was being delivered across both EYFS and KS1.
- Teachers have been supported in their end of year assessments via both Pete Gwynn and the PE coordinator via the updated assessment formats and skills progression documents.
- Positive Play provision has continued throughout the year during the lunchtime play periods for all year groups. The Mid-Day Meals / TLA support during these times has allowed children to have active and healthy lunchtime experiences, directed into purposeful sports activities and games.
- Positive Play training for Mid-Day Meal supervisors has also impacted their ability to deploy a wider variety of games and activities, thereby increasing the provision of active opportunities for children to engage in physical movement outside of their scheduled PE sessions.
- This lunchtime play provision has also allowed for more engaging and constructive playing between children which in turn has seen benefits towards positive behaviours displayed both during the lunch period and through the afternoon learning sessions in the classrooms.
- Opportunities have been provided for children to attend a range of before and after-school clubs, thereby raising the profile of PE / Sports and encouraging children to lead a healthy and active lifestyle.
- All children across KS1 throughout the year have been invited to attend sporting events competing against other schools in our locality. These have included ½ Mile running events, New Age Kurling, Multi-skills and 4-Square. These events have allowed those that have attended to engage in healthy competition against children of a similar age range whilst also raising the profile of sport and providing opportunities for children to be active away from school.
- All children across EYFS and KS1 took part in our School Sports Day, where parents / carers were able to attend and cheer the children on as they undertake a wide variety of competitive sporting activities against their classmates.
- EYFS also took part in an additional Reception Sports Event held at our school, competing in activities against our closest locality schools of Georgina Gardens and St. John the Baptist.
- Topic material focussed on 'Keeping Healthy' have been planned for, delivered and monitored across both EYFS and KS1 throughout the school year. These have helped to develop pupil's awareness of the importance of physical fitness and making healthy life choices whilst linking to the National Curriculum objectives outlined in PE, Science, PSHE and DT.
- A Gifted and Talented Sports Event was held at our EPIS premises. A select group of children from locality schools (Georgian Gardens / St. John the Baptist) were chosen for showing greater aptitude in PE / Sports and took part in three competitive events of 4-Square, Sit-Down Volleyball and New Age Kurling.
- A Sports Inclusion Event for both Pupil Premium / SEND children was also held in partnership with the Angmering School. This event invited PP/SEND children from our locality schools who had not had access to attend sports events throughout the year, to participate in New Age Kurling tuition before taking part in a friendly competition between school teams.
